# Acme Health Plan - Request for Proposal: Enterprise AI Platform

This document is synthetic sample content for testing.

## 1 Introduction

Acme Health Plan is a fictional regional health plan serving members in three states. It seeks a partner to build an enterprise AI platform for care management.

### 1.1 Background

Care managers currently review claims and clinical notes manually in a legacy portal. Prior authorization turnaround averages nine days.

## 2 Submission Instructions

Proposals are due by 5:00 PM ET on March 15, 2027 via the Acme procurement portal.

Responses must not exceed 30 slides. Questions are accepted until February 1, 2027.

# 3 Scope of Work

The vendor will design, build and operate the platform for an initial term of two years.

## 3.1 Data Integration

The platform must ingest clinical data through FHIR R4 APIs from the Example EHR system and claims data from the existing data warehouse on a nightly schedule.

## 3.2 Compliance

All components must align with HIPAA and HITRUST CSF requirements. The vendor must support CMS-0057 interoperability rules for prior authorization.

## 4 Requirements

| ID | Requirement | Mandatory |
|---|---|---|
| R-01 | Single sign-on with the Acme identity provider | Yes |
| R-02 | Model monitoring and drift alerts | Yes |
| R-03 | Self-service analytics workspace | No |

## 5 Evaluation Criteria

Technical approach 40 percent, experience 30 percent, cost 30 percent.
